

The background of the slide is a blue-tinted photograph of the Shanghai skyline, featuring the Oriental Pearl Tower on the left and the Shanghai Tower on the right, with other skyscrapers in between. The water of the Bund is visible at the bottom.

UYATECH 有涯科技

SHANGHAI UYA TECHNOLOGY CO.,LTD

Upgrade Your Automation.

About us

UYATECH was founded in 2017 by a group of young people, but with many years experience in automation handling application. Since the beginning of the very first day, we dedicate ourselves to designing and manufacturing the most cost-effective EOAT (end-of-arm-tooling) for our customers all over the world.

We started from press automation, such as tandem line press tooling, transfer press automation tooling, hot-stamping automation tooling. Most of our products are standard modular toolings like suction cups, spring plungers, vacuum generators, tube clamps, round tubes, quick disconnect housing&bayonet, pneumatic clamps. As we grew with reputation, we took part in laser cutting automation (handling of cutting sheet metal, fixture designing and manufacturing), handling device with end effectors in ergonomics area.

We will continue to focus on automation industry, to develop new devices and parts for industry applications and human being activities.

Establishment

Aug. 24th, UYATECH was founded in Shanghai.

2017

2018

Partnership

In April, UYATECH became MISUMI's official vendor for automation tooling;

In May, UYATECH joined with Shanghai Maritime University for automation handling area.

Global Business

UYATECH started exporting products to Thailand and USA.

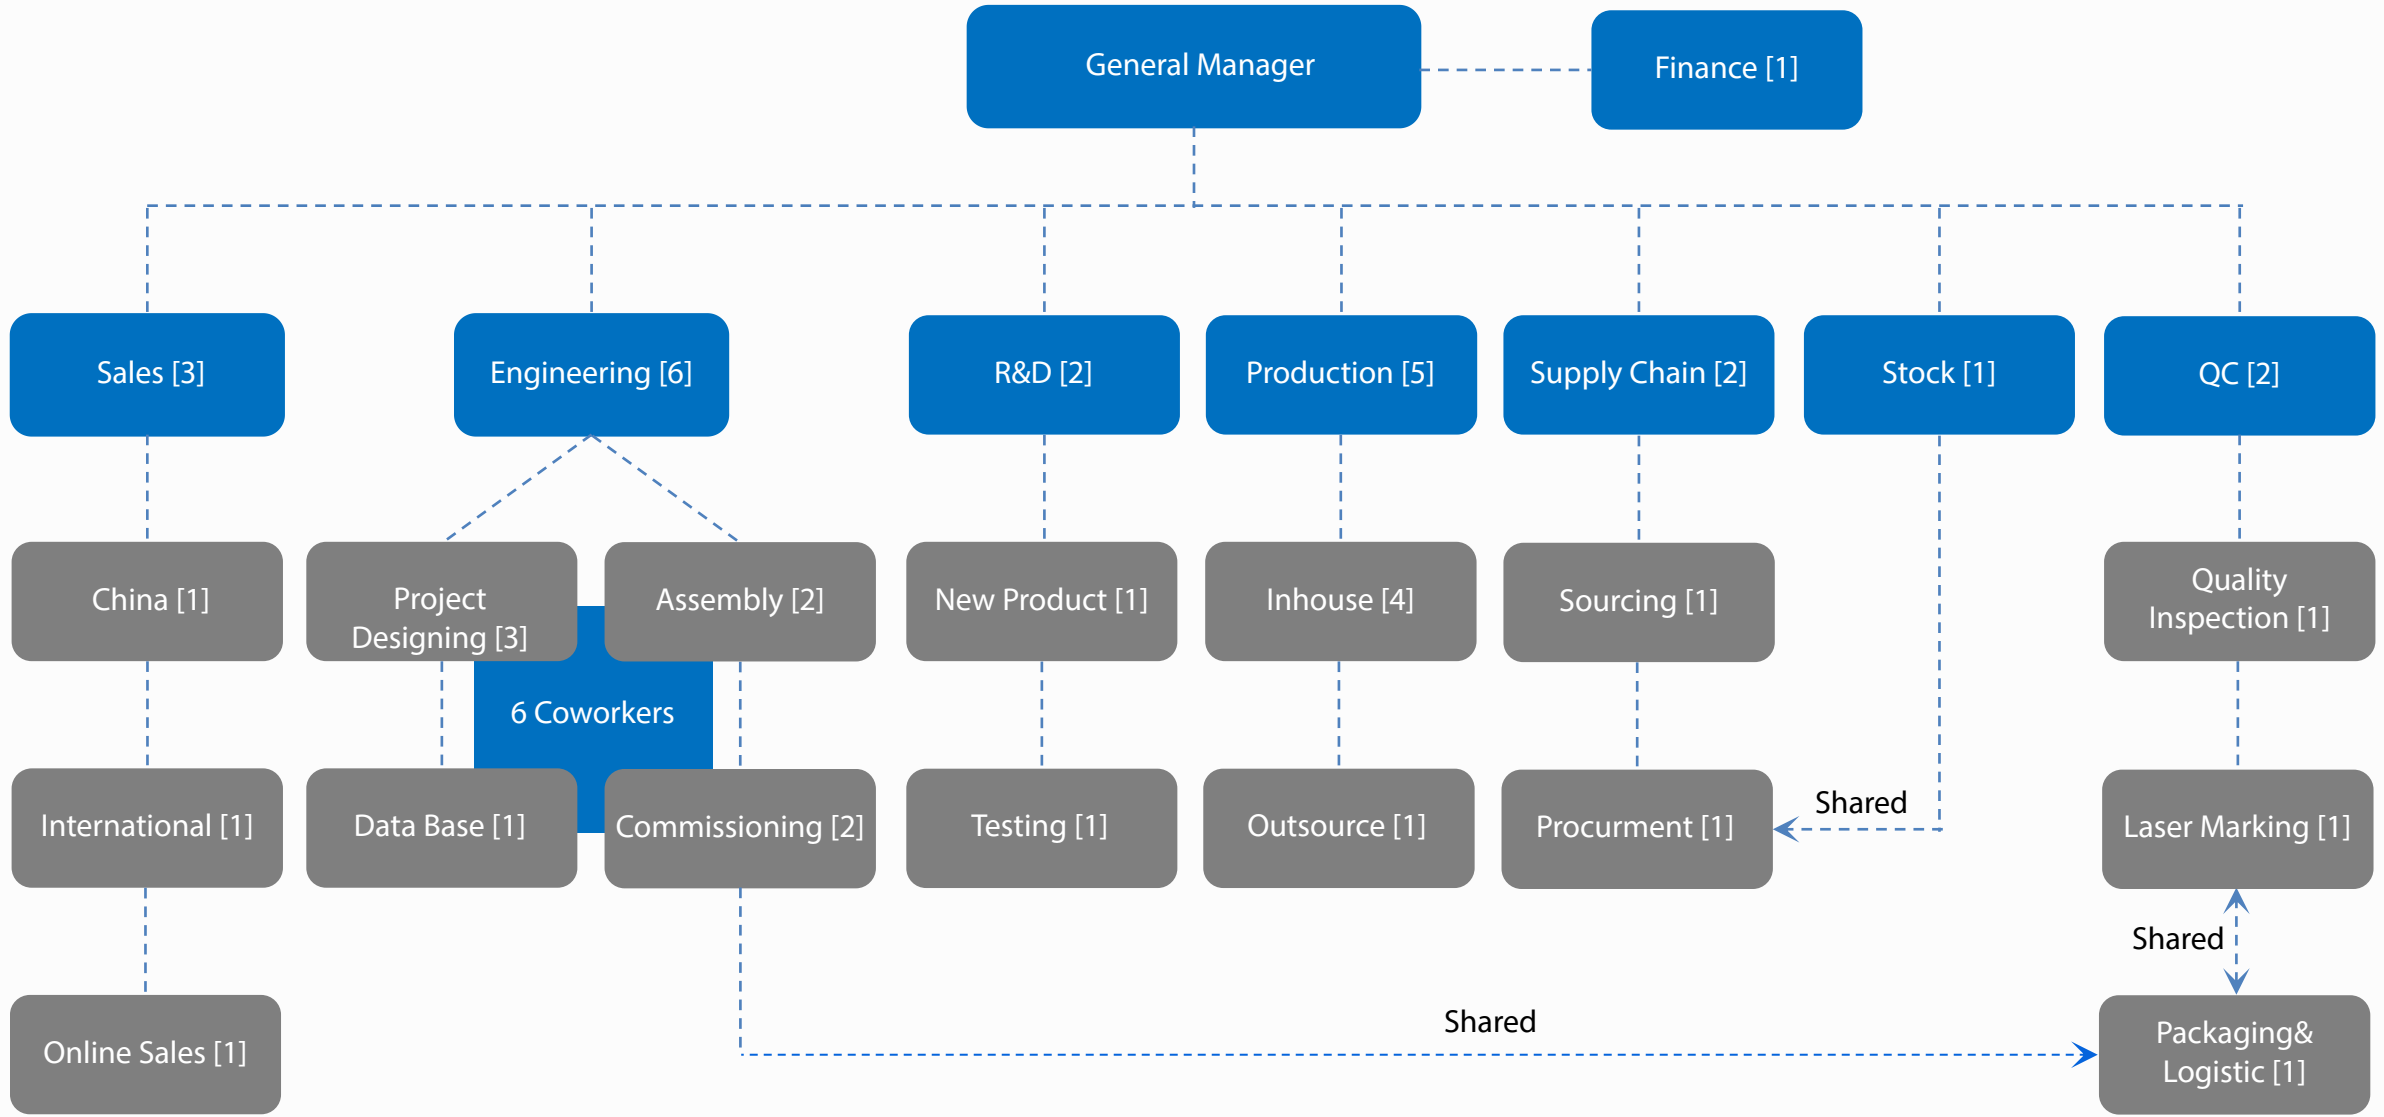

2019

2020

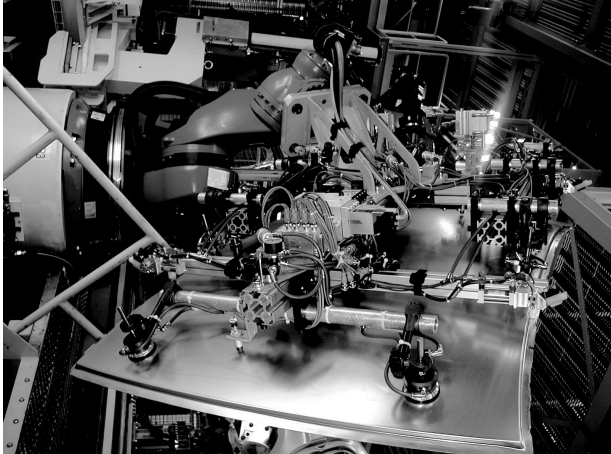

Expanding (in the plan)

- 1- Move to new factory
- 2- Exhibition in CIIF Shanghai and Euro BLECH in Hanover.

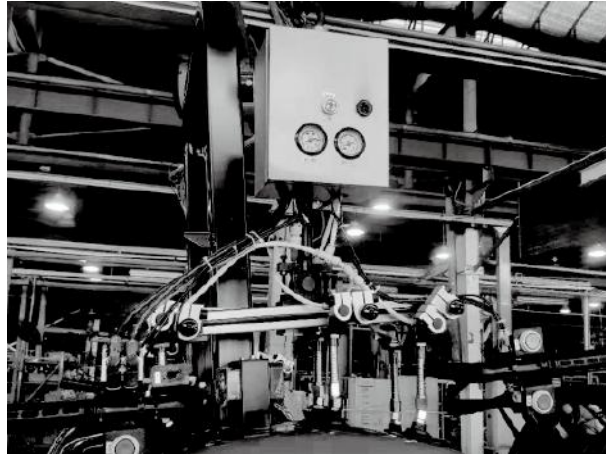

Sheet Metal Handling

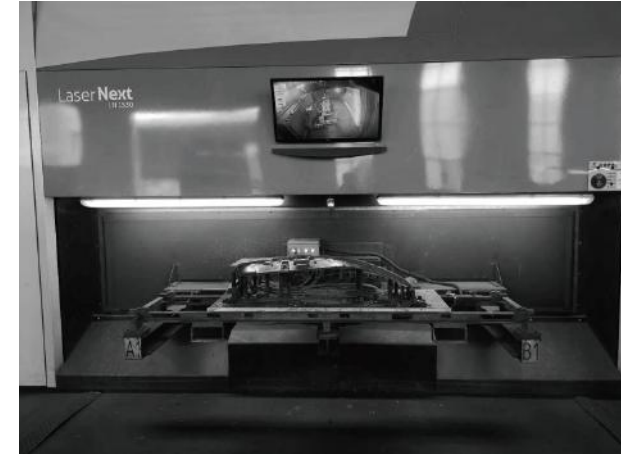

- >Tandem Line automation tooling
- >Transfer press automation tooling
- >Hot-forming automation tooling

Plastic/Food/Packaging/Ergonomics Handling

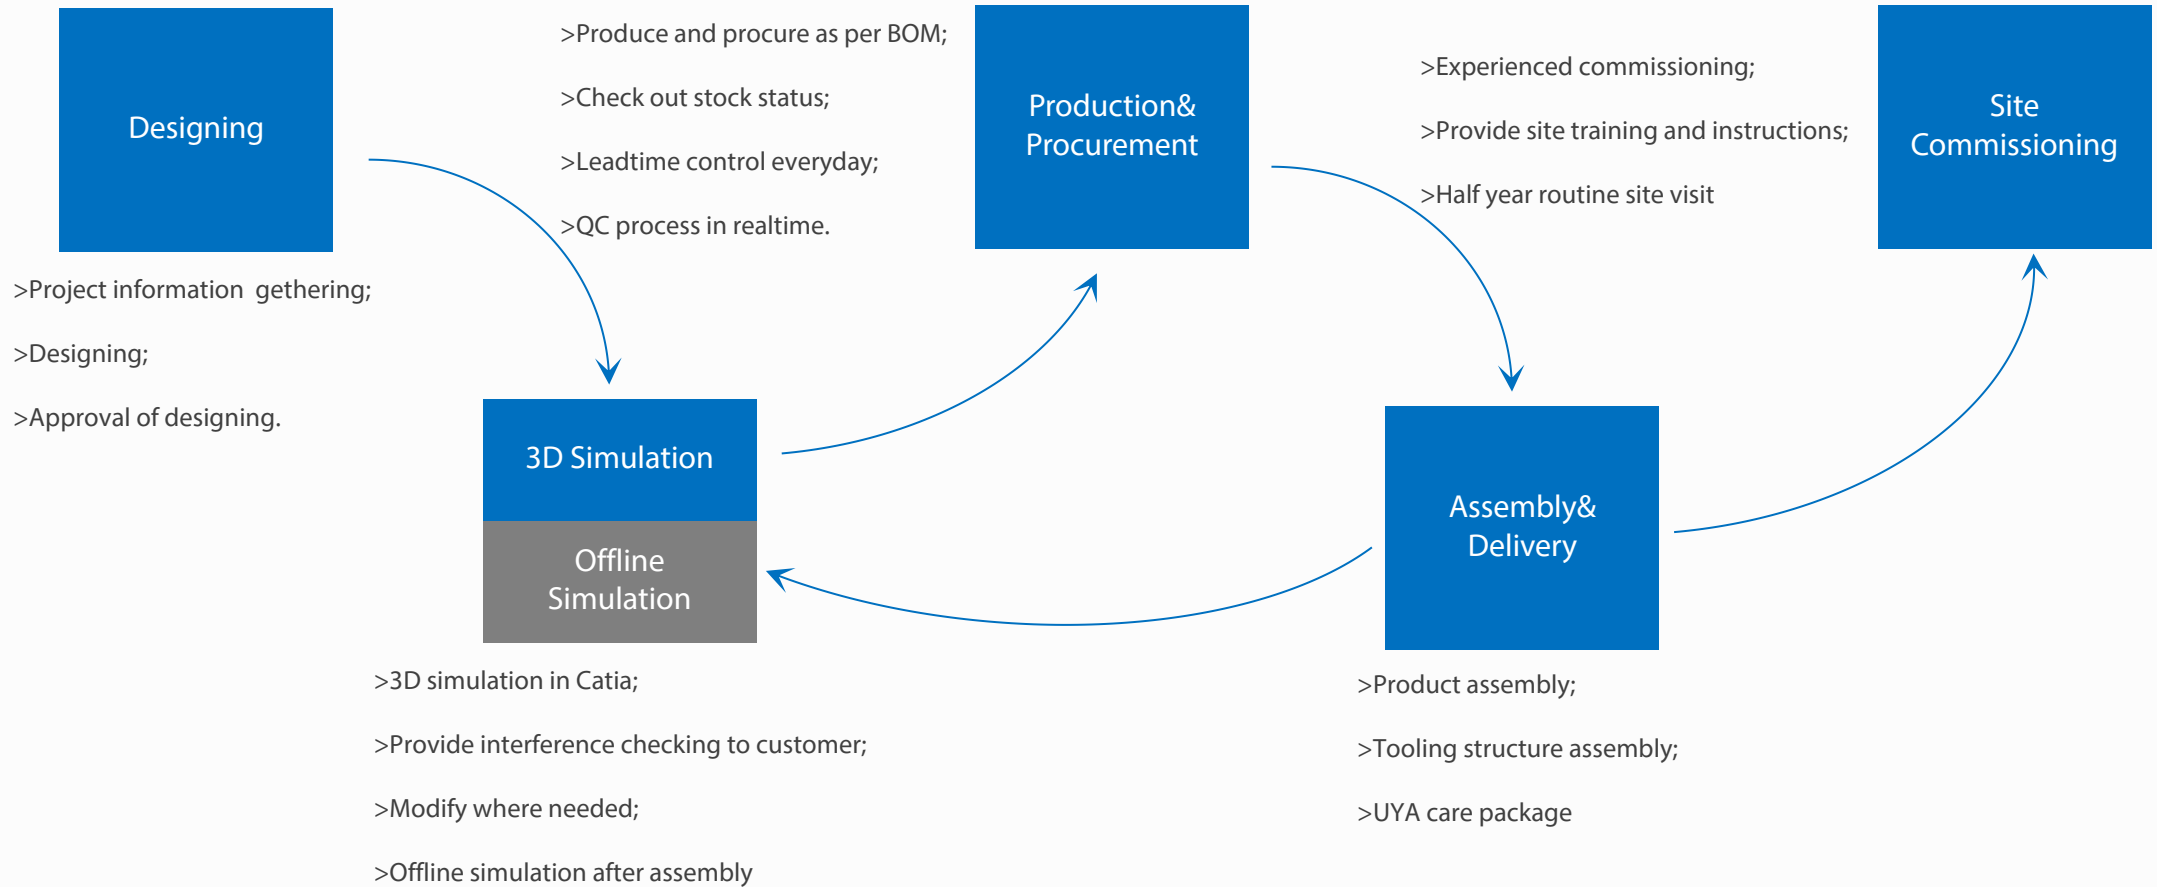

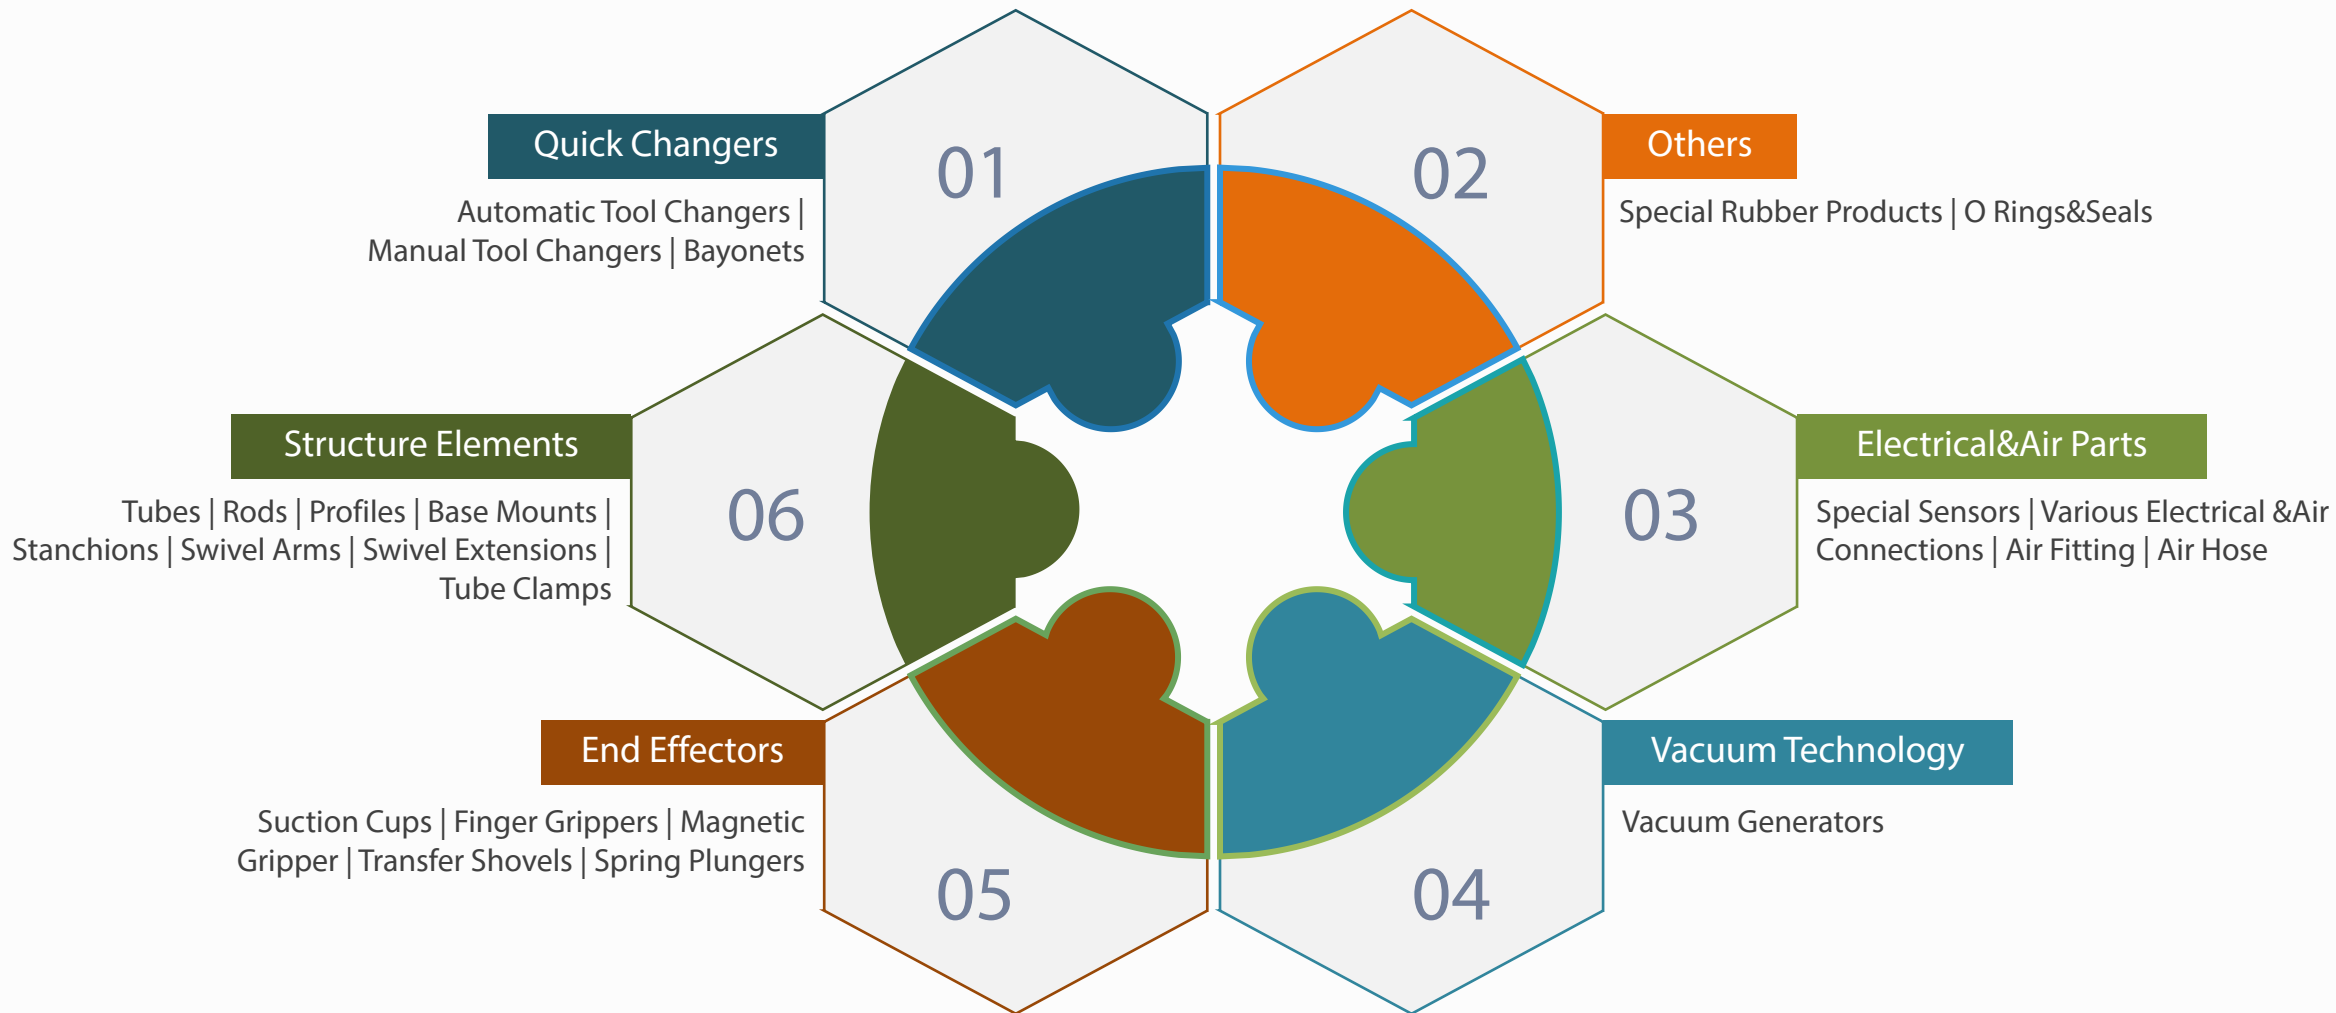

- >Plastic End-of-arm-tooling
- >Ergonomics Manipulator
- >Part Handling in food/packaging industry

Laser Cutting

- >Laser cutting loading&unloading
- >Laser cutting fixture
- >Electrical connections and signal set up

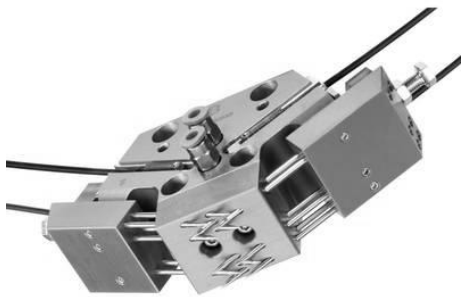

New Products Development In 2020

01

Needle Gripper

Needle gripper for handling light, thin and pliable materials such as carbon fibre mats from the composite field.

02

Foam Gripper

Foam gripper are used to handle cartons, planks of wood or any other product which has a continuously varying size.

03

Bernoulli Gripper

Non-contact, deformation-resistant transport of thin and sensitive products
Suitable for porous products

Main Machining Equipments

Turn-mill Lathe [2]

CNC Machine [2]

CNC Lathe [1]

Grinding Machine [2]

Milling Machine [2]

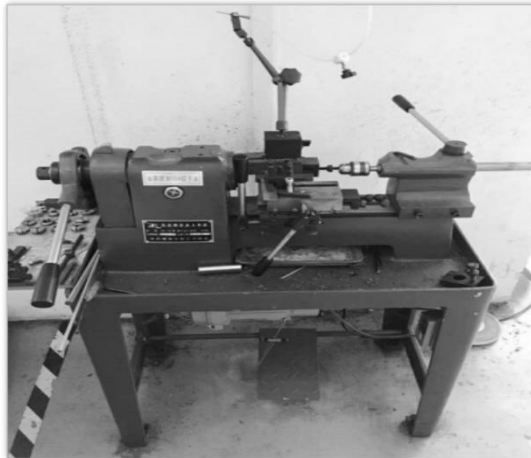

Lathe [1]

Auxiliary Machining Equipments

Laser Marking [1]

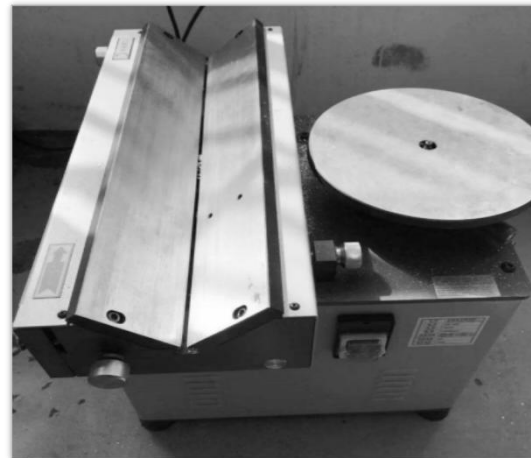

Gauge Lathe [1]

Automatic Tapping [1]

Tool Sharpener [1]

Chamfering Machine [1]

Grinding Machine [1]

Supply Chain System

"We deeply understand that our partner is a very important factor for our success. We give the best payment terms for our supplier, to help, to understand our partner when they need. meanwhile evaluate their performance, to make a better ecological chain."

---Paul
